

**ABSTRACT**

We disclose a composition, comprising at least about 5 wt% of a monovinylarene-conjugated diene copolymer; from about 0.1 wt% to about 2.5 wt% of an ultraviolet (UV) absorber; and from about 0.1 wt% to about 2.5 wt% of a light stabilizer. This  
5 composition imparts UV stability to monovinylarene-conjugated diene copolymer compositions and articles made therefrom.
